Kampolo Tomas Vaino Amunyela

Software Engineer & IT Specialist

Windhoek, Namibia · kampolotomasva@gmail.com · +264 81 850 3687 · linkedin.com/in/kampolo-tomas-8453b129b · kampolo-tomas.netlify.app

PROFILE

Informatics graduate focused on data: relational database design, SQL, business intelligence and reporting, with 19 MIT Universal AI certificates in machine learning, deep learning and large language models, plus the engineering skills to build and ship it.

EDUCATION & CERTIFICATIONS

Bachelor of Informatics Final year, 2026

Namibia University of Science and Technology (NUST), Windhoek

Business Intelligence & Analytics, Data Analytics, Database Programming, Information Systems Security, Systems Analysis & Design, Data Networks, Website Development.

MIT Open Learning — Universal AI Programme Feb – Jun 2026

19 course certificates

Covering Python, data analytics and machine learning, neural networks, deep learning and computer vision, large language models, LLM-based AI agents, multimodal AI, prescriptive AI, explainability and AI ethics.

DATA PROJECTS

Patient Records Data Management System 2025 · University

Relational database prototype modelled on DHIS2 structures, with role-based access control, data-entry forms, query reports and a backup and recovery procedure.

Automated Network Uptime Monitor 2025 · University

Python tool that pings critical nodes, emails alerts on failure, logs uptime history to a database and produces daily availability reports.

HR Management System — Support Module 2024 · University

Backend module with role-based access control and performance optimisation, with admin documentation and user guides.

Multi-channel chatbot platform 2026 · Personal

Chatbot platform with a visual flow builder, AI replies, shared inbox and public API (Node.js, Express, SQLite). Two-factor login, hashed API keys, signed webhooks. Main author, built with Claude Code; channels tested with mocks, not yet live.

EXPERIENCE

Software Engineer (Work-Integrated Learning) Jul 2026 – Present

Kellerman ICT — Janeebra platform, Windhoek

- Developed backend REST APIs and authored Firestore security rules for role-based access control.
- Created an automated API security test suite in pytest.
- Contributed to a polls feature across mobile, web, admin and API, and to mobile performance work.

IT Support Specialist (Freelance) Jan 2021 – Present

Independent Contractor, Windhoek

- Delivered hardware maintenance, network configuration and system administration for individuals and small businesses.
- Kept asset registers, job logs and technical documentation.

SKILLS

Data: Relational design, SQL, PostgreSQL, MySQL, SQLite, DHIS2 data structures, business intelligence, data analytics

AI / ML: Machine learning, neural networks, deep learning, computer vision, LLMs, AI agents (coursework and projects)

Engineering: Python, TypeScript, Node.js, Git, pytest, REST APIs

IT: Microsoft 365, networking, access control, technical documentation

OTHER

HP LIFE (IT for Business Success, Customer Experience for Business Success, Social Media Marketing, Jun 2026); Simplilearn Project Management 101; IT Customer Support Basics.

Member, ISACA Windhoek Chapter. Team leader, NUST Capital Edge — NSIC 2026 stock trading competition.

Languages: Oshindonga, English, Afrikaans.
