PROFILE

Informatics graduate building mobile, web and backend software with React Native, Node.js and Python, on a foundation of IT support, networking, databases and applied AI. Currently a software engineer on a work-integrated-learning placement at Kellerman ICT.

EXPERIENCE

Software Engineer (Work-Integrated Learning) Jul 2026 – Present

Kellerman ICT — Janeebra platform, Windhoek

- Built mobile features in React Native and Expo, including in-app password change and dark mode aligned to the web design system.
- Contributed to a polls feature across mobile, web, admin and API, and to mobile performance work.
- Developed backend REST APIs and authored Firestore security rules for role-based access control.
- Created an automated API security test suite in pytest.
- Work through a Git pull request workflow under senior developer supervision.

IT Support Specialist (Freelance) Jan 2021 – Present

Independent Contractor, Windhoek

- Delivered hardware maintenance, network configuration and system administration for individuals and small businesses.
- Administered Microsoft 365: user accounts, permissions, Azure AD, Teams, SharePoint and OneDrive.
- Troubleshot TCP/IP, DNS, DHCP, VPN and email across Windows, macOS and Linux.
- Kept asset registers, job logs and technical documentation.

General IT & Administration Assistant 2020 – Present

Benito Trading Enterprises, Outapi / Windhoek

- Set up and maintained equipment, high-volume printers and office systems.
- Produced graphic design and branded materials for clients.
- Supervised a subcontracted team in 2024: working hours, equipment tracking and incident handling.

EDUCATION

Bachelor of Informatics Final year, 2026

Namibia University of Science and Technology (NUST), Windhoek

Business Intelligence & Analytics, Data Analytics, Database Programming, Information Systems Security, Systems Analysis & Design, Data Networks, Website Development.

National Senior Certificate (Grade 12) 2020

Ruacana Vocational Senior Secondary School

PROJECTS

Multi-channel chatbot platform 2026 · Personal

Chatbot platform with a visual flow builder, AI replies, shared inbox and public API (Node.js, Express, SQLite). Two-factor login, hashed API keys, signed webhooks. Main author, built with Claude Code; channels tested with mocks, not yet live.

shipcheck 2026 · Personal

A personal standard for AI coding assistants: match the codebase, and back every "done" claim with a check that was run. Published as a Claude Code skill with adapters for other tools.

Patient Records Data Management System 2025 · University

Relational database prototype modelled on DHIS2 structures, with role-based access control, data-entry forms, query reports and a backup and recovery procedure.

Automated Network Uptime Monitor 2025 · University

Python tool that pings critical nodes, emails alerts on failure, logs uptime history to a database and produces daily availability reports.

IT Infrastructure Security Audit 2025 · University

Audit of a simulated enterprise network: found access-control and compliance weaknesses, applied hardening and defined incident response procedures.

HR Management System — Support Module 2024 · University

Backend module with role-based access control and performance optimisation, with admin documentation and user guides.

CERTIFICATIONS

MIT Open Learning — Universal AI Programme, 19 course certificates (Feb–Jun 2026): Introduction to Universal AI; Python Coding, Parts 1–2; Foundations of Data Analytics and Machine Learning; Supervised and Unsupervised Learning; Foundations of Neural Networks; Deep Learning and Computer Vision; Hands-on Deep Learning; Large Language Models; LLM-based AI Agents; Multimodal AI; Model-Driven Prescriptive AI, Parts 1–2; Data-Driven Prescriptive AI; Explainability and Fairness; Explanation, Reasoning and AI Ethics; Generative AI, the Future of Work and Human Creativity; AI and Entrepreneurship; AI and Sustainability: Transportation.

HP LIFE (IT for Business Success, Customer Experience for Business Success, Social Media Marketing, Jun 2026); Simplilearn Project Management 101; IT Customer Support Basics.

SKILLS

Software: TypeScript, JavaScript, Node.js, Express, React, React Native, Expo, Next.js, Python; foundational PHP and Django REST

Data: PostgreSQL, MySQL, SQLite, Firebase / Firestore, business intelligence, data analytics

AI: LLM integration and chat flows, AI-assisted development, machine learning and AI agents (coursework)

Security: Access control and RBAC, API security testing, Firestore security rules (foundational), vulnerability assessment

IT & networking: Microsoft 365 administration (Azure AD, Teams, SharePoint, OneDrive), TCP/IP, DNS, DHCP, VPN, firewall configuration, hardware troubleshooting

Tools: Git, pytest, Vitest, Claude Code, technical documentation

COMMUNITY & LANGUAGES

Member, ISACA Windhoek Chapter. Team leader, NUST Capital Edge — NSIC 2026 stock trading competition.

Languages: Oshindonga, English, Afrikaans. Nationality: Namibian.
